## Microsoft Copilot (Microsoft 365): Structured Document Generation with Forms

■ □ □ IN DEVELOPMENT

SharePoint

Microsoft Copilot (Microsoft 365)

ROLLOUT START  
October 2026

Structured Document Generation with Forms enables organizations to create, manage, and generate standardized documents at scale with built-in governance and compliance in SharePoint. Business process owners can centrally build and maintain form-driven templates -- such as contracts, agreements, proposals, and HR documents -- ensuring content stays accurate and up to date. Users can then generate the right document every time by just filling out the form, without manual formatting, versioning issues, or compliance risk, simplifying high-volume, structured document workflows across the organization.

Microsoft Teams: Facilitator detects and answers questions

Microsoft Teams

Microsoft Copilot (Microsoft 365)

IN DEVELOPMENT

ROLLOUT START

November 2026

Facilitator now automatically detects open questions raised during a Teams meeting and offers to help answer them using web search. When a participant asks a question (e.g., "What is an LLM?") and no one answers, Facilitator posts a prompt offering to find an answer. Participants can select "Yes" to have the agent retrieve and share the information.

IN DEVELOPMENT

ROLLOUT START

November 2026

In addition to capturing real-time notes and meeting outcomes during scheduled or hybrid meetings, the Facilitator agent assists you with notes, decisions and actions for in-person meetings in Teams Rooms on Android. Simply invite Facilitator with one tap of the room console. Meeting notes appear on the front of room display or touch board, are available via meeting recap when shared, and deleted if no one selected. Rest assured no data remains in the room. Available with Teams Rooms Pro.
